Assignments:

//Make Number List

Write a short program using a **for loop** to create an array list called **multiplesOf3** of the of the first 100 multiples of 3 starting with 0. Upon completing this ArrayList, have the computer print the contents of the ArrayList. Use one of the ActiveCode windows to write and run your program.

//Remove Even Multiples of 3

Modify the program written for "Make Number List" to remove even multiples of 3 from the arraylist and display the arraylist to the screen,
